CLIMATE CONTROL FOR THE PHARMACEUTICAL INDUSTRY

**PROVIDING PRODUCT SECURITY AND BUSINESS CONTINUITY
THROUGH ACCURATE TEMPERATURE CONTROL**

WHEN TEMPERATURE MATTERS

Be it temperature monitoring, ambient, chilled or frozen storage, Adcock are here to provide a system tailored to your needs. We've been in the business long enough to know that no two companies are the same, so we don't offer a one-size-fits-all solution. Working with a number of the UK's leading pharmacologists, we provide a bespoke solution for each individual application to optimise your business performance.

By teaming up with the world's most reputable manufacturers, we are able to offer the best solution every time from all leading brands. Our engineers are fully trained in selecting, installing and servicing these systems to the highest standards.

Choosing Adcock means you benefit from a wealth of experience and skill in the area. Our reputation has been built over more than 50 years, with our customer service and dedication to providing tailored systems setting us apart in the industry. As well as benefiting from our core values, choosing Adcock also gives you access to;

- We operate 24 hours a day, 7 days a week, 365 days a year - Nationwide
- Britain's best trained and qualified engineers
- Same-day response for most emergencies
- Individual personal service

With over 85% of our work coming through repeat custom or referral, we've built a business you can trust. We also partner on many high-security, fully confidential projects so you can rely on our complete discretion.

WE ALREADY WORK WITH A NUMBER OF LEADING BUSINESSES IN YOUR SECTOR

WHAT'S YOUR BACKUP PLAN?

Running a fluid pharmaceutical business means having all the bases covered. Whilst your current system may keep operations running smoothly in the present, what contingencies do you have in place to cover system failure or power outage?

We pride ourselves on delivering cost-effective systems that keep your business running, no matter what the circumstance. Working on an N+1 basis we can build a backup system capable of smoothing over any issues that may occur.

What's more, by choosing Adcock, you get access to the latest technologies, meaning in most cases we can identify an issue long before you're even aware of it. By sending alerts of any potential issues, you get a timely warning to get your system repaired and keep your stock secure.

We know that failing equipment means a loss of profit (stock wastage), time (paperwork) and inconvenience. Adcock are here to make that a thing of the past, optimising your company performance and ensuring your business continues to run smoothly.

To discuss your requirements and system, please email us on enquiries@adcock.co.uk or visit www.adcock.co.uk

1. PROVIDING THE OPTIMAL WORKING TEMPERATURE FOR YOUR MACHINERY

Getting the right temperature isn't just vital for storage, but for your machinery too. Our air-conditioning and refrigeration units are capable of providing temperatures from -40°C to +40°C, meaning no matter what you need, we can create the ideal working environment.

2. LIVE MONITORING

Our live monitoring system keeps you up to date with exactly how your system is performing. By alerting you to any changes in temperature, you're prepared for any circumstance. In many cases our monitoring systems can alert us to problems with your system, long before you even notice.

3. KEEPING YOU RUNNING IN CASE OF EMERGENCY

Most businesses notice their refrigeration or air-conditioning systems when they fail in the height of summer. When your business is reliant on regular temperature control, failing to prepare is preparing to fail. We design and build our systems to take every scenario into consideration, including increased ambient temperatures meaning should your system ever fail you, our back up system will be right there in its place.

4. INDUSTRY LEADING CUSTOMER SERVICE

Since Adcock's launch over five decades ago, our ethos and approach have stood the test of time. Quality workmanship, morals and service still set us apart from our competitors, and our customers are at the heart of everything we do.
