Would you like energy-efficient heat pump heating for any room in your home, or home office with the added advantage of cooling being available during the hot summer months and to pay no VAT on it?

The Covid-19 pandemic has had a big impact on our working life with many companies adopting working from home at least part of the time.

Home working has become a preferred choice for many, and one thing everyone is trying to replicate is the controlled indoor climate from which they used to benefit when working in the office. Heat pump air conditioning installations are becoming a popular solution to achieve this at home.

With low power consumption yet powerful performance, these units are also key to getting a good night's sleep when it is too warm. They will help to reduce humidity levels too.

Adcock's partnership with manufacturers like Daikin, Mitsubishi Electric and Panasonic means we can design ever more energy efficient and environmentally friendly systems using world-leading smart technology. We select equipment that effortlessly blends with any style or age of building. Our energy efficient heat pump air conditioning systems will keep your rooms at a comfortable temperature all year round.

FROM 1ST APRIL 2022 UNTIL 31 MARCH 2027 A ZERO VAT RATE APPLIES TO THE INSTALLATIONS OF AIR SOURCE REVERSE CYCLE HEAT PUMP AIR CONDITIONING SYSTEMS TO RESIDENTIAL PROPERTIES.
